- Produce and Record Your Own Music in MP3, WAV and MIDI

# PRODiKEYS™ DM

# CREATIVE®

# The 'Must-Have' Dual Keyboard For Every Home and School PC

## Features & Benefits

\* Also available in Beige in certain countries

## Creative® Prodikeys™ DM Software

Prodikeys DM software is designed with 6 easy-to-use play modes for you to learn, play and create music easily at your PC. You can also record and save each performance into MIDI, WAV or MP3 format.

**Learn mode** lets you learn to play a selected song in 5 guided lessons. Each lesson is graded automatically. Download additional songs available in Learnable format.

**IntelligentChord mode** intelligently adds the right accompaniment to any melody you play - giving you great sounding music even when playing with just one hand.

**FunTunes mode** is pre-programmed with cool professional deejay mixes on the music keyboard.

**FixedChord mode** loops a chord progression for you to jam and play ad-lib.

**PentaTunes mode** lets you play tunes along with the chosen rhythm style using only the white keys, while impressive fill-ins, rhythms and effects are played on the black keys.

**Perform mode** lets you play professionally with customizable chord and music settings. You can also import MIDI or sequence files for accompaniment.

## Minimum System Requirements

- Intel® Pentium® 233MHz or higher
- Desktop PC with Intel or 100% compatible motherboard chipset
- Available PS/2 keyboard port
- 128MB RAM
- 360MB hard disk space
